

Politechnika Krakowska im. T. Kościuszki, Wydział Inżynierii Lądowej

Instytut Inżynierii Drogowej, Kolejowej i Transportu

Katedra Systemów Transportowych

## ZASADY ZALICZENIA ZAJĘĆ

przedmiot:..... **Introduction to transportation planning**

rodzaj zajęć/wymiar godzin: ..... **projekty/22,5**

forma/stopień/rok/semestr studiów: ... **stacjonarne/I/II/3**

kierunek/specjalność: ..... **Civil Engineering/brak specjalności**

semestr/rok akademicki: ..... **semestr zimowy/rok akademicki 2018/2019**

1. The project exercise consists of nine partial projects. Each of the partial projects should be completed during the design class (except exercise 1. and 9.), as instructed by the instructor.
2. Individual partial projects are credited during current class, by presenting to the instructor. Exercises 1. and 9. are credited during subsequent class. The instructor notes it in the column "Mark I".
3. If there are minor errors in the executed project, the instructor will note the conditional pass "cond-pass". To get a full credit, mistakes must be removed for subsequent classes. In this case, the instructor notes on the subject sheet "pass" in the "Mark II" column. Failure to correct errors for subsequent classes is equivalent to failure to pass partial project (see p. 5).
4. In the case of failure of a partial project, "fail" will be noted in the column "Mark I". A student can credit partial project on subsequent class again. In this case, the instructor records on the subject sheet "pass" in the "Mark II" column.
5. Failure of a partial project in the second term means supplementing the partial project no later than the last design classes in semester .
6. Students pass the exercises without marks.
7. Calculators are required for classes.
8. Attendance is compulsory. Each student is entitled to 1 absence. More than one unjustified absence results in failure of design classes.
